REFLECTION OF SOVIET BLOC PILOTS/TECHNICIANS IN CUBAN AIR FORCE TRAINING

(1 MAY - 4 MAY 62)

COMINT sources reveal Russian and non-Cuban voice activity on Cuban Revolutionary Air Force tactical frequencies since 1 May.

Concentrated efforts have been made by Bloc pilots and controllers to converse entirely in Spanish but, on occasion, they have reverted to their native tongue to convey a difficult command or request to other Bloc pilots or controllers. In only one recorded instance has a Bloc pilot requested a Cuban controller to speak more slowly because he was unable to understand.

In practically all noted CRAP major operations or new training techniques a Bloc pilot, most probably Russian, has been observed as the flight instructor or as an observer on hand to assist and advise as necessary. See [REDACTED] and [REDACTED]

The following gives a breakdown of all non-Cuban voice activity noted on the Cuban Air Force Tactical nets:

Designates indicate pilot suffixes.

SAB stands for San Antonio De Los Baños, SC for Santa Clara, CAM for Camaguey.

(T) denotes tower, (GCI) denotes ground control intercept, (DF) denotes direction finder, and (CCA) denotes ground control approach.
